“Rail Steel Plant Specialists” Seminar

Juiz de Fora, MG - Brazil

March 02 - 04, 2010

“Rail Steel Plant Specialists” Seminar

Juiz de Fora, MG - Brasil

March 02 - 04, 2010

Victory Business Hotel

In the national steel industries players of the Brazilian market there are a business group that usually meet frequently looking forward to interchange experiences, share solutions, treat and update information related to the different operations mode and logistic of their plants.

As a result of Vossloh South America initiative, during its participation at Business On Rails 2009 and by Vossloh North America cooperation through the recently acquired company GRS – Global Rail Systems, it was proposed to this important business group to make an integration of some suppliers companies of Brazilian market on their next meeting to ensure new targets and views integrated into this context and present on that opportunity new technologies and solutions of the market.

Brazilian Steel Mills have an extended internal rail system for raw material reception, logistics of finished products and translation of materials during the production process as well. In some cases, there are railways up to 100 Km and an important quantity of installed switch gear.

Finally, the seminar brought together professionals from the railway operation of domestic steel mills lines where an exchange of experiences, discussions of common problems and suggested solutions were among the many topics discussed.

The involvement of corporate sponsors was positively crucial for the presentations of current market solutions.
